Permanent Link to Evaluation Kit by NVS Technologies

2021/07/29

Photo: NVS Technologies Evaluation Kit NV08C-EVK-CSM by NVS Technologies is a set of instruments for a developer of systems based on NVS Technologies' NV08C-CSM module. Use of EVK-CSM is a convenient way to learn functionality of NV08C-CSM and begin system design. The EVK-CSM may be used in navigation systems to obtain the current position (latitude, longitude and elevation), velocity vector, and time GNSS signals including GPS, GLONASS, Galileo, Compass, and SBAS in any location on Earth and at any time. The EVK-CSM is a flexible tool that allows users to evaluate various modes of operation of the NV08C-CSM and to override a default configuration and connection diagram with jumpers. Connectors and jumpers on EVK-CSM PCB provide simple monitoring of intermediate signals and parameters (digital IOs state, power supply voltages, and currents on individual supply inputs).
