Permanent Link to NVS Technologies Selected by Advanced Navigation for Spatial Miniature GNSS/INS System

2021/07/27

Advanced Navigation, a developer of 3D navigation technologies, has launched its Spatial product series, featuring NVS Technologies AG's NV08C-MCM high-performance multiple GNSS-constellation receiver. The Spatial is a ruggedized miniature GNSS/INS & AHRS system that provides accurate position, velocity, acceleration and orientation under demanding conditions. It combines temperature calibrated accelerometers, gyroscopes, magnetometers and a pressure sensor with an advanced GNSS receiver. These are coupled in a sophisticated fusion algorithm to deliver accurate and reliable navigation and orientation, Advanced Navigation said. The Spatial product line takes advantage of the NV08C-MCM's multi GNSS constellation support, ensuring high availability of navigation signals, high sensitivity, providing reliability, accuracy and performance. Advanced Navigation is a privately owned Australian company that specializes in the development of 3D navigation technologies. The company's engineers come from a background in mission critical robotics built to military specifications.
